

Secure Multi-Cloud Environments Workshop

Get a customized threat & vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system.

Workshop highlights

Discover threats and vulnerabilities in your hybrid environment

Learn how to prioritize and mitigate potential threats to your servers and services.

Understand what can be done to reduce the attack surface area for hybrid workloads.

Learn about benefits and capabilities of Microsoft Defender for Cloud and Azure Network Security.

Develop defined next steps based on your needs and objectives.

Do you have a good understanding of security vulnerabilities in your hybrid and multi-cloud environment including VMs, databases, Azure storage and more? Are you aware of the number of suspected authentication activities across your multi-cloud environment? In short, are you confident about the cloud security posture of your organization?

Improve your cloud security posture with a Secure Multi-Cloud Environments Workshop

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your hybrid and multi-cloud security objectives—and identify current and real threats—by scheduling a Secure Multi-Cloud Environments Workshop.

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to improve your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, apps, endpoints, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, security threats and vulnerabilities in your hybrid and multi-cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security priorities and needs for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest tools

What to expect:

During this-workshop, we'll partner with you to strengthen your organization's approach to hybrid cloud security. We'll help you better understand how to prioritize and mitigate potential attacks:

- **Analyze** your requirements and priorities for a hybrid cloud security detection and response solution.
- **Define Scope** & deploy Microsoft Defender for Cloud in the production environment, onboarding servers and other selected services.
- **Explore** Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- **Discover** existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- **Discover** threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- **Recommend** next steps on proceeding with a production deployment of Microsoft Defender for Cloud and Azure Network Security.

Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security, IT Compliance, and/or IT Operations
- Data Governance

Why **fitts**?

When it comes to compliance, you need an experienced partner.

We really listen to your people. Whether we're deploying digital, cloud or security solutions, our first priority is to understand your people, how they work and what they need. By fitting technology around people – and not the other way round – it becomes inclusive, easy to use and widely adopted. And that means it is genuinely transformational.

Driven by people.
Powered by outcomes.
